

About Dazzled Cars

Dazzled Cars is a mobile application aimed at car enthusiasts and the global automotive marketplace. It brings together individual car devotees and automotive businesses in a shared enterprise level interactive community, bridging the gap between social platforms and e-commerce. The multi-platform functionality provides a broader range of services with greater end-user focus than other social media or mobile applications. Dazzled Cars is the social way to save money, and share a global passion for cars. We also aim to help automotive businesses grow through building their brands, online presence and improving sales.
